Geodis México / WMS Support Analyst

JULY, 2021 - CURRENT, TLALNEPANTLA DE BAZ, STATE OF MEXICO

- Support about 50+ operative people in a warehouse related to WMS topics. This is a fast-paced environment where decisions must be taken in favor of the system and the deliveries.
- Supervise that systems, processes, data and people are working well.
- Train small groups of people (2-5) for WMS.
- Maintenance to the auditing and shipping label generator application through .NET code

Technologies used: .Net (VB.Net), SQL Server 2008, High Jump WMS

Areté / Developer Jr.

FEBRUARY, 2019 - NOVEMBER, 2020, TLALNEPANTLA DE BAZ, STATE OF MEXICO

- Take requirements for maintenance or correction of errors for the various internal systems (inventory systems, PO processing systems, shipping systems and so on). Every project consisted in a linear development model, i.e. analysis, documentation, development, [testing by another team], deployment. This process must be done for each requirement we received.

Technologies used: .Net (C#, VB.Net), SQL Server 2008, HTML, Javascript (jQuery), Reporting Services

Comisión Reguladora de Energía / .NET Fullstack Developer

JULY, 2018 - JANUARY, 2019, BARRANCA DEL MUERTO, MEXICO CITY

- Taking requirements for creation or maintenance of features for the internal systems through the following development stages: analysis, development, documentation, testing and deployment.
- Optimize and clean existing processes in internal systems.
- Supervision of our third-party consultory requirements.

Technologies used: C#, HTML, Javascript (jQuery), SQL Server

GBMobile / Javascript Developer

SEPTEMBER, 2016 - JUNE, 2018, ATIZAPÁN DE ZARAGOZA, STATE OF MEXICO

- Creation of landing pages with HTML, CSS and AngularJS technologies.
- Creation and maintenance to administrative web applications through the technologies mentioned above.

Technologies used: HTML, CSS (Bootstrap), Javascript (AngularJS)

Nerdy Trust / IT Consultant

JANUARY, 2016 - AUGUST, 2016, CUAUTITLÁN IZCALLI, STATE OF MEXICO

I collaborated on some projects like websites and hybrid phone applications developing from Front-End to Back-End.

- Prepalbero (www.prepalbero.mx). Kind of Intranet for Prepalbero High school.
- MrFele. It was a sports video editing web application. It was developed with the `ffmpeg` command tool linked to some PHP code and the GUI was designed in order that the user could edit the videos from there.
- Social network for pet sale, buy and adoption.

Technologies used: **HTML, CSS (Bootstrap), Javascript (jQuery, EmberJS), PHP (CodeIgniter), MySQL, Apache Cordova**
